REASON FOR ALLOWANCE

1. Claims 20, 27-32, 38 are allowable over cited prior art.
2. The following is an examiner's statement of reasons for allowance: monitoring a signal level corresponding to frequencies emitted by the read/write device; comparing the signal level relative to a detection threshold; when the monitored signal level exceeds the detection threshold, controlling the second oscillator to generate the second clocking signal during a cyclic polling time of a polling cycle; if the monitored signal level reverts to a level below the detection threshold, switching off the second oscillator; supplying the second clocking signal to a data receiver for data reception at a data reception rate during the cyclic polling time; supplying the second clocking signal to a data demodulator during the cyclic polling time, wherein the second clock frequency is sufficiently high relative to the data reception rate to over sample the data being received by the data receiver and, upon a recognition of valid data, performing data demodulation by the demodulator of the received data, wherein the second oscillator is switched on in advance by a predefined time interval relative to the start of the cyclic polling time and prior to performing the demodulation of the received data, wherein power consumption during the cyclic polling time comprise a second power consumption magnitude higher than the first power consumption magnitude, wherein the duration of the cyclic polling time is selected to reduce power consumption and increase an operating life of said at least one delectable energy store; and upon

completion of the data demodulation, or a recognition of invalid data, reverting the mobile data memory to the cycle inactive idle mode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
